CONTENTS

<i>Preface</i>	<i>page ix</i>
PART 1: BASIC TOOLS	1
1.1 The Fourier Transform	1
1.2 The Hilbert Transform and Analytic Signal	8
1.3 Statistics and Linear Regression	10
1.4 Coordinate Transformations	14
PART 2: ELASTICITY AND HOOKE'S LAW	17
2.1 Elastic Moduli – Isotropic Form of Hooke's Law	17
2.2 Anisotropic Form of Hooke's Law	19
2.3 Thomsen's Notation for Weak Elastic Anisotropy	25
2.4 Stress-Induced Anisotropy in Rocks	26
2.5 Strain Components and Equations of Motion in Cylindrical and Spherical Coordinate Systems	32
2.6 Deformation of Inclusions and Cavities in Elastic Solids	34
2.7 Deformation of a Circular Hole – Borehole Stresses	45
2.8 Mohr's Circles	48
PART 3: SEISMIC WAVE PROPAGATION	51
3.1 Seismic Velocities	51
3.2 Phase, Group, and Energy Velocities	54

3.3	Impedance, Reflectivity, and Transmissivity	57
3.4	Reflectivity and AVO	60
3.5	AVOZ in Anisotropic Environments	65
3.6	Viscoelasticity and Q	70
3.7	Kramers–Kronig Relations Between Velocity Dispersion and Q	75
3.8	Waves in Layered Media: Full-Waveform Synthetic Seismograms	77
3.9	Waves in Layered Media: Stratigraphic Filtering and Velocity Dispersion	82
3.10	Waves in Layered Media: Frequency-Dependent Anisotropy and Dispersion	86
3.11	Scale-Dependent Seismic Velocities in Heterogeneous Media	91
3.12	Scattering Attenuation	95
3.13	Waves in Cylindrical Rods – The Resonant Bar	100

PART 4: EFFECTIVE MEDIA 106

4.1	Hashin–Shtrikman Bounds	106
4.2	Voigt and Reuss Bounds	110
4.3	Wood’s Formula	112
4.4	Hill Average Moduli Estimate	114
4.5	Composite with Uniform Shear Modulus	115
4.6	Rock and Pore Compressibilities and Some Pitfalls	117
4.7	Kuster and Toksöz Formulation for Effective Moduli	121
4.8	Self-Consistent Approximations of Effective Moduli	123
4.9	Differential Effective Medium Model	129
4.10	Hudson’s Model for Cracked Media	133
4.11	Eshelby–Cheng Model for Cracked Anisotropic Media	140
4.12	Elastic Constants in Finely Layered Media – Backus Average	142

PART 5: GRANULAR MEDIA 147

5.1	Packing of Spheres – Geometric Relations	147
5.2	Random Spherical Grain Packings – Contact Models and Effective Moduli	149
5.3	Ordered Spherical Grain Packings – Effective Moduli	160

PART 6: FLUID EFFECTS ON WAVE PROPAGATION 162

6.1	Biot’s Velocity Relations	162
6.2	Geertsma–Smit Approximations of Biot’s Relations	166
6.3	Gassmann’s Relations	168
6.4	BAM – Marion’s Bounding Average Method	177

6.5	Fluid Substitution in Anisotropic Rocks: Brown and Korringa's Relations	179
6.6	Generalized Gassmann's Equations for Composite Porous Media	181
6.7	Mavko–Jizba Squirt Relations	184
6.8	Extension of Mavko–Jizba Squirt Relations for All Frequencies	186
6.9	BISQ	190
6.10	Anisotropic Squirt	192
6.11	Common Features of Fluid-Related Velocity Dispersion Mechanisms	197
6.12	Partial and Multiphase Saturations	202
6.13	Partial Saturation: White and Dutta–Odé Model for Velocity Dispersion and Attenuation	207
6.14	Waves in Pure Viscous Fluid	212
6.15	Physical Properties of Gases and Fluids	214

PART 7: EMPIRICAL RELATIONS 221

7.1	Velocity–Porosity Models: Critical Porosity and Nur's Modified Voigt Average .	221
7.2	Velocity–Porosity Models: Geertsma's Empirical Relations for Compressibility	225
7.3	Velocity–Porosity Models: Wyllie's Time Average Equation	226
7.4	Velocity–Porosity Models: Raymer–Hunt–Gardner Relations	228
7.5	Velocity–Porosity–Clay Models: Han's Empirical Relations for Shaley Sandstones	231
7.6	Velocity–Porosity–Clay Models: Tosaya's Empirical Relations for Shaley Sandstones	233
7.7	Velocity–Porosity–Clay Models: Castagna's Empirical Relations for Velocities	234
7.8	V_P – V_S Relations	235
7.9	Velocity–Density Relations	250

PART 8: FLOW AND DIFFUSION 255

8.1	Darcy's Law	255
8.2	Kozeny–Carman Relation for Flow	260
8.3	Viscous Flow	264
8.4	Capillary Forces	266
8.5	Diffusion and Filtration – Special Cases	268

PART 9: ELECTRICAL PROPERTIES 271

9.1	Bounds and Effective Medium Models	271
9.2	Velocity Dispersion and Attenuation	275
9.3	Empirical Relations	279
9.4	Electrical Conductivity in Porous Rocks	282

PART 10: APPENDIXES	289
10.1 Typical Rock Properties	289
10.2 Conversions	304
10.3 Moduli and Density of Common Minerals	306
 <i>References</i>	 313
<i>Index</i>	325
