Contents

Introduction ix

1 Non-Negative Operators 1
- 1.1 Definition and Basic Properties . . . 1
- 1.2 Sectorial Operators . . . 6
- 1.3 Examples of Non-Negative Operators . . . 8
  - 1.3.1 m-Accretive Operators . . . 9
  - 1.3.2 Negative of Generators of Semigroups . . . 11
  - 1.3.3 Product of Operators . . . 12
  - 1.3.4 Multiplication Operators . . . 12
  - 1.3.5 Generation of Sectorial Operators . . . 14
  - 1.3.6 Komatsu's Counterexample . . . 16
  - 1.3.7 Normal or Self-adjoint Sectorial Operators . . . 20
- 1.4 Non-Negative Operators in Locally Convex Spaces . . . 23
  - 1.4.1 Non-Negative Operators which are Not Sectorial . . . 27
- 1.5 Notes on Chapter 1 . . . 29

2 Differential Operators 31
- 2.1 Operators of Riemann-Liouville and Weyl . . . 31
- 2.2 The Derivative Operator in $\mathbb{R}$ . . . 35
- 2.3 The Laplacian Operator . . . 36
- 2.4 Second-Order Elliptic Differential Operators . . . 42
  - 2.4.1 Case 1: $p = 2$ . . . 42
  - 2.4.2 Case 2: $1 < p < \infty$ . . . 45
  - 2.4.3 Case 3: The Operator A_C . . . 48
  - 2.4.4 Case 4: $p = 1$ . . . 49
- 2.5 The Laplacian in a Locally Convex Space of Distributions . . . 53
- 2.6 Notes on Chapter 2 . . . 55

3 The Balakrishnan Operator 57
- 3.1 Definition of Balakrishnan and Basic Properties . . . 57
- 3.2 Expressions of the Balakrishnan Operator when $-A$ is the Infinitesimal Generator of an Equibounded C_0-Semigroup . . . 66
- 3.3 Examples . . . 69

3.4 Notes on Chapter 3 71

4 An Extension of the Hirsch Functional Calculus 73
4.1 Classes of Functions Associated to Radon Measures 73
4.1.1 Description of Different Classes of Functions 73
4.1.2 Examples 75
4.1.3 Uniqueness and Pointwise Convergence 77
4.1.4 A Characterization of the Class $\mathcal{T}_+$ 80
4.2 Functional Calculus 84
4.2.1 Definition and Basic Properties 85
4.2.2 Product Formula 87
4.2.3 Stability under Composition 93
4.3 Spectral Mapping Theorem 97
4.4 Hirsch Functional Calculus in Locally Convex Spaces 99
4.4.1 Integration in Locally Convex Spaces 99
4.4.2 Remarks on the Hirsch Functional Calculus in Locally Convex Spaces 102
4.5 Notes on Chapter 4 103

5 Fractional Powers of Operators 105
5.1 Definition of Fractional Power. Additivity 105
5.2 Representations of the Fractional Powers 114
5.3 Spectral Mapping Theorem 116
5.4 Sectoriality of the Fractional Powers. Multiplicativity 123
5.5 Semigroups Generated by Fractional Powers 129
5.6 Fractional Powers of Operators in Locally Convex Spaces 134
5.7 Notes on Chapter 5 138

6 Domains, Uniqueness and the Cauchy Problem 141
6.1 Domains of Fractional Powers 141
6.1.1 Domains of the Fractional Powers when $-A$ Generates an Equibounded C_0-Semigroup 148
6.2 Conditions for Uniqueness 151
6.2.1 Sufficient Conditions for Uniqueness 152
6.2.2 Spectral and Analyticity Conditions 154
6.2.3 n-th Roots of a Non-Negative Operator 157
6.3 The Second - Order Abstract Incomplete Cauchy Problem 164
6.4 Results in Locally Convex Spaces 169
6.5 Notes on Chapter 6 170

7 Negative and Imaginary Powers 171
7.1 Definitions and Basic Properties 171
7.2 The Balakrishnan and Komatsu Operators 175
7.3 Examples 178
7.4 Limit Operators Related to the Imaginary Power 182
7.5 Negative and Imaginary Powers on Locally Convex Spaces 188

7.6 Notes on Chapter 7 189

8 The Dore-Venni Theorem **191**
8.1 Definitions and Notations 191
8.2 Sectoriality and Boundedness of Exponential Type 192
8.3 The Dore Venni Theorem 200
8.4 Sum of Closed Operators in UMD Spaces 208
8.5 L^p Maximal Regularity 214
8.6 Notes on Chapter 8 216

9 Functional Calculus for C_0-groups **219**
9.1 The Mellin Transform 219
9.2 Functional Calculus for C_0-groups 221
9.3 Analytic Generators. Imaginary Powers of the Product 228
9.4 Imaginary Powers of the Sum of Operators 233
9.5 Notes on Chapter 9 242

10 Imaginary Powers on Hilbert Spaces **245**
10.1 Logarithms 245
10.1.1 Relationship between Power Angle and Spectral Angle . . 249
10.2 Bounded Functional Calculus 251
10.3 Notes on Chapter 10 255

11 Fractional Powers and Interpolation Spaces **257**
11.1 Introduction 257
11.2 Interpolation Spaces. The Real Method 261
11.3 Komatsu's Spaces 263
11.4 Komatsu's Spaces and Real Interpolation Spaces 268
11.5 Domains of Fractional Powers and the Komatsu Spaces 270
11.6 Interpolation Spaces. The Complex Method 273
11.7 Notes on Chapter 11 277

12 Fractional Powers of some Differential Operators **279**
12.1 Imaginary Powers of Differential Polynomials in $L^p(\mathbb{R}^n)$ 279
12.1.1 Imaginary Powers of Derivative Operators 283
12.1.2 Imaginary Powers of the Negative of the Laplacian 288
12.2 Riesz and Bessel Potentials 292
12.3 Fractional Sobolev Spaces 297
12.4 Notes on Chapter 12 303

A Appendix **307**
A.1 Nets 307
A.2 Linear Operators 307
A.3 Functional Analysis 310
A.3.1 Banach Spaces 310
A.3.2 Banach Algebras 312
A.3.3 Hilbert Spaces 313

A.4 Measure and Integration 315
A.4.1 Lebesgue Spaces 315
A.4.2 The Radon-Riesz Representation Theorem 316
A.4.3 Calculus Facts 319
A.5 The Stone-Weierstrass Theorem 320
A.6 Vector-Valued Functions 321
A.6.1 Analytic Functions 321
A.6.2 Integration Theory for Vector-Valued Functions 323
A.7 Semigroups 326
A.8 Convolution and Fourier Transforms 330
A.9 Harmonic Analysis 333
A.9.1 The Mikhlin Multiplier Theorem 333
A.9.2 The Riesz-Thorin Convexity Theorem 334
A.10 Distributions 335
A.11 Sobolev Spaces 337

Notations **341**

Bibliography **346**
