

# THEORY OF ELASTICITY

by

**L. D. LANDAU and E. M. LIFSHITZ**

*Institute of Physical Problems, U.S.S.R. Academy of Sciences*

**Volume 7 of Course of Theoretical Physics**

**Third English Edition, Revised and Enlarged**

by **E. M. LIFSHITZ, A. M. KOSEVICH and L. P. PITAEVSKIĬ**

*Translated from the Russian by*

**J. B. SYKES and W. H. REID**

**PERGAMON PRESS**

**OXFORD · NEW YORK · BEIJING · FRANKFURT**

**SÃO PAULO · SYDNEY · TOKYO · TORONTO**

|----------------------------------|--------------------|
| Prefaces to the English editions | <i>Page</i><br>vii |
| Notation                         | viii               |

## I. FUNDAMENTAL EQUATIONS

|   |    |
|---|----|
| §1. The strain tensor                                   | 1  |
| §2. The stress tensor                                   | 3  |
| §3. The thermodynamics of deformation                   | 7  |
| §4. Hooke's law   | 9  |
| §5. Homogeneous deformations                            | 11 |
| §6. Deformations with change of temperature             | 14 |
| §7. The equations of equilibrium for isotropic bodies   | 16 |
| §8. Equilibrium of an elastic medium bounded by a plane | 22 |
| §9. Solid bodies in contact                             | 26 |
| §10. The elastic properties of crystals                 | 32 |

## II. THE EQUILIBRIUM OF RODS AND PLATES

|  |    |
|--|----|
| §11. The energy of a bent plate              | 38 |
| §12. The equation of equilibrium for a plate | 40 |
| §13. Longitudinal deformations of plates     | 46 |
| §14. Large deflections of plates             | 50 |
| §15. Deformations of shells                  | 54 |
| §16. Torsion of rods                         | 59 |
| §17. Bending of rods                         | 64 |
| §18. The energy of a deformed rod            | 67 |
| §19. The equations of equilibrium of rods    | 70 |
| §20. Small deflections of rods               | 76 |
| §21. The stability of elastic systems        | 83 |

## III. ELASTIC WAVES

|   |     |
|---|-----|
| §22. Elastic waves in an isotropic medium | 87  |
| §23. Elastic waves in crystals            | 92  |
| §24. Surface waves                        | 94  |
| §25. Vibration of rods and plates         | 99  |
| §26. Anharmonic vibrations                | 104 |

## IV. DISLOCATIONS

|  |     |
|--|-----|
| §27. Elastic deformations in the presence of a dislocation | 108 |
| §28. The action of a stress field on a dislocation         | 116 |
| §29. A continuous distribution of dislocations             | 119 |
| §30. Distribution of interacting dislocations              | 124 |
| §31. Equilibrium of a crack in an elastic medium           | 127 |

|   | <i>Page</i> |
|---|-------------|
| <b>V. THERMAL CONDUCTION AND VISCOSITY IN SOLIDS</b>                                      |             |
| §32. The equation of thermal conduction in solids   | 133         |
| §33. Thermal conduction in crystals   | 134         |
| §34. Viscosity of solids  | 135         |
| §35. The absorption of sound in solids  | 137         |
| §36. Highly viscous fluids  | 142         |
| <b>VI. MECHANICS OF LIQUID CRYSTALS</b>   |             |
| §37. Static deformations of nematics  | 144         |
| §38. Straight disclinations in nematics   | 147         |
| §39. Non-singular axially symmetrical solution of the equilibrium equations for a nematic | 152         |
| §40. Topological properties of disclinations  | 156         |
| §41. Equations of motion of nematics  | 158         |
| §42. Dissipative coefficients of nematics   | 163         |
| §43. Propagation of small oscillations in nematics  | 165         |
| §44. Mechanics of cholesterics  | 170         |
| §45. Elastic properties of smectics   | 172         |
| §46. Dislocations in smectics   | 177         |
| §47. Equations of motion of smectics  | 179         |
| §48. Sound in smectics  | 182         |
| Index   | 185         |
