Topics in Torsion Theory

Paul E. Bland

WILEY-VCH

Berlin · Weinheim · New York · Chichester
Brisbane · Singapore · Toronto

TABLE OF CONTENTS

Preface 5

Introduction 9

§1. Preliminaries on Torsion Theory 11

§2. The Jacobson Radical, Simple Modules and Chain Conditions Relative to Torsion Theory. Nakayama's Lemma 29

2.1 Simple Modules and Maximal Submodules Relative to a Torsion Theory 29

2.2 The Jacobson Radical and Radical Free Modules Relative to a Torsion Theory 33

2.3 Noetherian Modules Relative to a Torsion Theory 39

2.4 Artinian Modules Relative to a Torsion Theory 49

§3. Composition Series Relative to Torsion Theory. The Generalized Hopkins–Levitzki Theorem 55

§4. Injective and Projective Concepts and Torsion Theory. The Generalized Baer and Fuchs Conditions. Relatively Flat Modules .. 65

4.1 (Quasi–)Injective Modules Relative to a Torsion Theory 65

4.2 (Quasi–)Projective Modules Relative to a Torsion Theory 81

4.3 Flat Modules Relative to a Torsion Theory 88

§5. Covers and Hulls 101

5.1 (Quasi–)Injective Hulls Relative to a Torsion Theory 102

5.2 (Quasi–)Projective Covers Relative to a Torsion Theory 113

5.3 Torsionfree Covers 126

NIEDERS. STAATS- U. UNIV.- BIBLIOTHEK

§6. Classical Properties of Rings Relative to a Torsion Theory 135

6.1 (Semi)Primitive, Simple and (Semi)Prime Rings Relative to a Torsion Theory 135

6.2 Semisimple Rings Relative to a Torsion Theory 143

6.3 Primitive Rings and Density Relative to a Torsion Theory 148
