# CONTENTS

## Introduction

	<i>Page</i>
Structure and Topology . . . . .	1
Nearness and Adjacency . . . . .	2
General Topology . . . . .	3
Finite and Infinite Topologies . . . . .	5
Format of the Text . . . . .	6
Applications . . . . .	7
Elementary Set Theory . . . . .	7

## Part I. FINITE TOPOLOGY

### *Chapter*

<b>1. Topological Spaces . . . . .</b>	<b>13</b>
1.1 Definition of a Topological Space . . . . .	13
1.2 Closed Sets and the Cotopology . . . . .	15
1.3 Bases and Subbases . . . . .	16
1.4 Irreducible Basis of a Topology . . . . .	17
1.5 Closure, Coclosure, Interior, and Boundary of a General Set . . . . .	19
1.6 Subspaces . . . . .	21
1.7 Product Spaces . . . . .	23
1.8 Metric Spaces . . . . .	24
<b>2. Finite Topologies and Lattices . . . . .</b>	<b>27</b>
2.1 Partially Ordered Sets and Lattices . . . . .	27
2.2 Distributive Lattices . . . . .	31
2.3 Intervals in Distributive Lattices . . . . .	32
2.4 Direct Products . . . . .	34
2.5 Reducibility . . . . .	37
<b>3. Finite Topologies and Graph Theory . . . . .</b>	<b>39</b>
3.1 Topologies and Directed Graphs . . . . .	39
3.2 Topologies and Graphs . . . . .	44
3.3 Subbases and Graphs . . . . .	47

Chapter	Page
<b>4. Connectivity</b> . . . . .	49
4.1 Topological and Graphical Connectivity . . . . .	49
4.2 Lattices of Connected and Disconnected Spaces . . . . .	51
4.3 Connectivity of Subsets . . . . .	52
4.4 Separated Sets . . . . .	53
<b>5. Classification of Topological Spaces: Separation Axioms</b> . . . . .	55
5.1 $T_n$ -Spaces . . . . .	55
5.2 Regular and Normal Spaces . . . . .	59
<b>6. Combinatorics</b> . . . . .	63
6.1 Cardinality of a Topology . . . . .	63
6.2 Cardinality of a Subspace; Number of Sets Containing a Given Subset . . . . .	69
6.3 Connected Sets . . . . .	71
6.4 Generating Functions . . . . .	74
6.5 Two-Point Correlation Functions in $T_{1/2}$ -Spaces . . . . .	77
<b>7. Functions and Continuity</b> . . . . .	81
7.1 Functions . . . . .	81
7.2 Continuous Functions . . . . .	83
7.3 Continuity in a General Finite Topological Space . . . . .	88
7.4 Fixed Points of Endomorphisms of $T_{1/2}$ -Spaces . . . . .	89
7.5 Quotient Maps . . . . .	92
7.6 Topology Induced by a Function . . . . .	95

## Part II. FINITE TOPOLOGY AND CHEMISTRY

<b>8. Topological Description of Molecular Structure</b> . . . . .	99
8.1 General Considerations . . . . .	99
8.2 Approaches to Molecular Topology . . . . .	100
8.3 Analysis of Molecular Topologies . . . . .	100
<b>9. Bond Topology</b> . . . . .	103
9.1 Construction of the Bond Topology . . . . .	103
9.2 Structure of the Bond Topology . . . . .	104
9.3 Combinatorial Properties of the Bond Topology . . . . .	108
9.4 Bond Topology of Alkanes . . . . .	119

<i>Chapter</i>	<i>Page</i>
<b>10. Graph Topology</b> . . . . .	121
10.1 Construction of the Graph Topology . . . . .	121
10.2 Structure of the Graph Topology . . . . .	127
10.3 Combinatorial Properties of the Graph Topology . . . . .	130
10.4 Coresiduality . . . . .	137
10.5 Topological Perturbation Theory and the Propagator . . . . .	143
10.6 Physical Models and the Graph Topology . . . . .	151
10.7 The Graph Topology of Extended Structures . . . . .	154
10.8 Topology of Saturated Hydrocarbons . . . . .	161
10.9 Continuous Transformations in the Graph Topology . . . . .	165
<b>11. Duplex Spaces</b> . . . . .	167
11.1 Duplex of a Graph . . . . .	167
11.2 Definition of the Duplex Space . . . . .	169
11.3 Cardinality of the Duplex Topology . . . . .	171
11.4 Duplex Spaces of Alternants . . . . .	173
11.5 Duplex Spaces of Nonalternants . . . . .	175
11.6 Paraspectrality . . . . .	175
<b>12. Topology of Chemical Reactions</b> . . . . .	179
12.1 Chemical Reaction Spaces . . . . .	179
12.2 Kinetics in Chemical Reaction Spaces . . . . .	183
 <b>Appendixes</b>	
Appendix A. Number of Finite Topologies and Some of Their Lattices . . . . .	191
Appendix B. Coresiduality in Molecular Orbital Theory . . . . .	197
Appendix C. Some Properties of the Fibonacci Numbers . . . . .	203
Appendix D. Alternative Formulations of the Combinatorics of Independent Sets . . . . .	205
Appendix E. Group of a Finite Topology . . . . .	211
Appendix F. Openness and Topological Bond Orders as Probabilities . . . . .	215
Appendix G. Graphs Having the Same Number of Independent Sets; A Contraction-Subdivision Identity for $\sigma(G)$ . . . . .	219
Appendix H. Some Special Spaces . . . . .	223
 <b>Bibliography</b> . . . . .	 227
 <b>Index</b> . . . . .	 229
