Introduction viii

1 The Fundamentals 1

1.1 Laplace Transforms 1

1.2 Fourier Transforms 6

1.3 Linear Ordinary Differential Equations 11

1.4 Complex Variables 16

1.5 Multivalued Functions, Branch Points, Branch Cuts and Riemann Surfaces 27

1.6 Some Examples of Integration Which Involve Multivalued Functions 30

2 Transform Methods with Single-Valued Functions 51

2.1 Inversion of Laplace Transforms by Contour Integration 55

2.2 Inversion of Fourier Transforms by Contour Integration 68

2.3 The Solution of Partial Differential Equations by Laplace Transforms 80

2.4 The Solution of Partial Differential Equations by Fourier Transforms 114

2.5 The Solution of Partial Differential Equations by Hankel Transforms 123

Papers Using Laplace Transforms to Solve Partial Differential Equations 130

Papers Using Fourier Transforms to Solve Partial Differential Equations 158

Papers Using Hankel Transforms to Solve Partial Differential Equations 161

3 Transform Methods with Multivalued Functions 163

3.1 Inversion of Laplace Transforms by Contour Integration 163

3.2 Inversion of Fourier Transforms by Contour Integration 206

3.3 The Solution of Partial Differential Equations by Laplace Transforms 221

3.4 The Solution of Partial Differential Equations by Fourier Transforms 245

Papers Using Laplace Transforms to Solve Partial Differential Equations 254

Papers Using Fourier Transforms to Solve Partial Differential Equations 260

4 The Joint Transform Method 263

4.1 The Solution of Partial Differential Equations Using the Joint Transform Method 263

4.2 Inversion of the Joint Transform by Cagniard's Method 290

4.3 The Modification of Cagniard's Method by De Hoop 305

4.4 Expansions in Terms of Leaky Modes 313

Papers Using the Joint Transform Technique 324

Papers Using the Cagniard Technique 335

Papers Using the Cagniard-de Hoop Technique 340

5 The Wiener-Hopf Technique **347**

5.1 The Wiener-Hopf Technique When the Factorization Contains No Branch Points 348

5.2 The Wiener-Hopf Technique When the Factorization Contains Branch Points 362

5.3 The Wiener-Hopf Technique with a Finite Scatterer 368

Papers Using the Wiener-Hopf Technique 379

Worked Solutions to Some of the Problems **409**

Index **487**
