

Tungsten

Properties, Chemistry, Technology of the
Element, Alloys, and Chemical Compounds

**Erik Lassner and
Wolf-Dieter Schubert**

*Vienna University of Technology

Contents

CHAPTER 1. The Element Tungsten: Its Properties

1.1. Analogous to Atom Related Physical Properties	1
1.1.1. Nucleus	2
1.1.2. Electron Configuration	2
1.1.3. Spectra	3
1.1.4. Thermodynamic Functions	6
1.2. Bulk Tungsten Metal Related Physical Properties	7
1.2.1. Electronic Structure and Bonding	7
1.2.2. Structural Properties	11
1.2.3. Mechanical Properties	16
1.2.4. Thermal Properties	30
1.2.5. Electromagnetic Properties	34
1.2.6. Optical Properties	36
1.2.7. Electron Emission	40
1.2.8. Acoustic Properties	42
1.3. Chemical Properties of Tungsten Metal	42
1.3.1. General Remarks	42
1.3.2. Reactions with Nonmetals	46
1.3.3. Reactions with Metals	46
1.3.4. Reactions with Compounds	50
1.3.5. Reactions with Aqueous Solutions	53
1.3.6. Miscellaneous	55
1.3.7. Reactions with Organic Compounds	56
References for Chapter 1	56

CHAPTER 2. Tungsten History: From Genesis to the 20th Century Products

2.1. The Formation of Tungsten Atoms	61
2.2. How Tungsten Atoms Came on Earth	63
2.3. Average Abundance	64
2.4. Geology: Formation of Ore Deposits	65

2.5. Minerals	69
2.6. Ore Deposits and Reserves.	70
2.7. Early Discoveries of Ores, Compounds, and of the Element	77
2.8. Technically Important Discoveries	79
2.9. Industrial Evolution	80
References for Chapter 2	83

CHAPTER 3. Important Aspects of Tungsten Chemistry

3.1. Oxidation of Tungsten Metal by Air or Oxygen.	85
3.2. Reaction of Tungsten with Water	86
3.3. Reduction of Tungsten Oxides by Hydrogen	88
3.3.1. Introduction	88
3.3.2. Thermodynamic Considerations.	89
3.3.3. Formation of a Volatile Tungsten Oxide Hydrate [WO ₂ (OH) ₂].	91
3.3.4. Kinetic Considerations.	91
3.3.5. Influence of Foreign Elements.	103
3.4. Reduction of Tungsten Oxides by Carbon or Carbon-Containing Compounds	107
3.5. Reduction of Tungsten Halides	110
3.5.1. Introduction	110
3.5.2. Reduction of WF ₆	111
3.5.3. Reduction of WCl ₆ by Hydrogen.	113
3.5.4. Reduction of WCl ₆ by Carbon-Containing Reagents	113
3.6. Reaction of Tungsten with Carbon or Carbon-Containing Compounds (Carburization).	114
3.6.1. Carburization of Tungsten Powder by Solid Carbon	115
3.6.2. Formation of Tungsten Carbides in Melts	118
3.6.3. Preparation of Coarse Tungsten Carbide Powder in an Auxiliary Melt	118
3.6.4. Preparation of Tungsten Carbide in Salt Melts	119
3.7. Chemistry of Aqueous Tungsten Solutions	119
3.8. Electrochemistry of Tungsten	123
3.8.1. Introduction	123
3.8.2. Cathode Reactions.	125
3.8.3. Anodic Processes	125
3.8.4. Molten Salts.	126
3.8.5. Practical Applications of Electrochemical Processes	126
3.8.6. Electrochromism	126
References for Chapter 3	129

CHAPTER 4. Tungsten Compounds and Their Application

4.1. Tungsten and Metals: Intermetallic Compounds and Phases	133
4.2. Tungsten and Nonmetals	133

4.2.1. Tungsten and Boron	135
4.2.2. Tungsten and Carbon	139
4.2.3. Tungsten and Silicon	143
4.2.4. Tungsten and Nitrogen	143
4.2.5. Tungsten and Phosphorus	144
4.2.6. Tungsten and Arsenic	145
4.2.7. Tungsten and Oxygen	145
4.2.8. Tungsten and Sulfur	165
4.2.9. Tungsten and Selenium	167
4.2.10. Tungsten and Tellurium	167
4.2.11. Tungsten and Fluorine	167
4.2.12. Tungsten and Chlorine	169
4.2.13. Tungsten and Bromine	171
4.2.14. Tungsten and Iodine	172
4.3. Mixed Ligand and Coordination Compounds of Tungsten	173
4.3.1 Mixed Ligand Compounds	173
4.3.2. Coordination Compounds	174
4.4. Organometallic Tungsten Compounds	176
References for Chapter 4	176

CHAPTER 5. Industrial Production

5.1. Mining and Ore Beneficiation	179
5.1.1. Mining	179
5.1.2. Ore Beneficiation	179
5.2. Hydrometallurgy	184
5.2.1. Introduction including Ecological and Economical Considerations	184
5.2.2. Raw Materials and Their Treatment	187
5.2.3. Digestion–Dissolution	191
5.2.4. Purification Steps	194
5.2.5. Conversion of Sodium to Ammonium Isopolytungstate Solution . .	197
5.2.6. Modern Methods in Chinese Plants	201
5.2.7. Ammonium Paratungstate Crystallization	205
5.3. The Highly Pure Intermediates	208
5.3.1. Ammonium Paratungstate (APT)	208
5.3.2. Tungsten Trioxide	212
5.3.3. Tungsten Blue Oxide (TBO)	212
5.3.4. Tungstic Acid	214
5.3.5. Ammonium Metatungstate (AMT)	214
5.4. Tungsten Metal Powder Production	215
5.4.1. General	215
5.4.2. Push-Type Furnace	221
5.4.3. Rotary Furnace	223
5.4.4. Tungsten Powder	225

5.4.5. Reduction of Doped Tungsten Oxides	229
5.5. Powder Metallurgy	231
5.5.1. Compacting	231
5.5.2. Sintering	233
5.5.3. Fabrication of Tungsten	239
5.6. Alternative Processes	244
5.6.1. Electron-Beam Zone Melting	244
5.6.2. Plasma Spraying	244
5.6.3. Chemical Vapor Deposition	244
5.6.4. Physical Vapor Deposition (Sputtering)	245
5.7. Special Tungsten Forms and Qualities	245
5.7.1. Globular Tungsten Powder	245
5.7.2. Coarse Tungsten Powder	245
5.7.3. Single Crystals	246
5.7.4. Tungsten Thin Films	246
5.7.5. Porous Tungsten	246
5.7.6. High-Purity Tungsten	247
References for Chapter 5	250

CHAPTER 6. Tungsten Alloys

6.1. Substitutional Alloys (Solid-Solution Alloys)	256
6.1.1. Tungsten–Rhenium Alloys	256
6.1.2. Tungsten–Tantalum Alloys	258
6.1.3. Tungsten–Titanium Alloys	259
6.2. Dispersion-Strengthened and Precipitation-Hardening Alloys	259
6.2.1. Non-Sag Tungsten	259
6.2.2. Alloys with Oxide Dispersoids	266
6.2.3. Alloys with Carbide Dispersoids	268
6.3. Tungsten Composites	270
6.3.1. Tungsten Heavy Metal Alloys	270
6.3.2. Tungsten Copper and Tungsten Silver	276
6.3.3. Tungsten-Fiber-Reinforced Composites	278
References for Chapter 6	281

CHAPTER 7. Tungsten and Tungsten Alloy Products

7.1. Lighting Application	283
7.2. Electrical Engineering	286
7.3. Electronics	289
7.4. High-Temperature Technique	291
7.5. Welding, Cutting, Plasma Spraying, Spark Erosion, and Vapor Deposition	293
7.6. X-Rays, Radiation, Medical Engineering	297
7.7. Mechanical and Engine Engineering	298

7.8. Leisure Time and Sports Equipment	300
7.9. Chemical Industry and Metallurgy	301
7.10. Space Aviation	302
7.11. Military Applications	302
7.12. Aviation	304
7.13. Laser Technique	304
References for Chapter 7	305

CHAPTER 8. Tungsten in Melting Metallurgy

8.1. Tungsten in Steel	307
8.1.1. Introduction	307
8.1.2. Master Alloys	309
8.1.3. Tungsten Alloyed Steels	312
8.2. Superalloys	317
8.3. Stellite Alloys	318
References for Chapter 8	320

CHAPTER 9. Tungsten in Hardmetals

9.1. Introduction	321
9.2. Raw Materials	324
9.2.1. Tungsten Carbide Powder	324
9.2.2. Other Carbide Powders	343
9.2.3. Binder Metals	344
9.2.4. Other Materials	344
9.3. Hardmetal Production	345
9.3.1. Preparation of Powder Grades	345
9.3.2. Powder Consolidation	348
9.3.3. Sintering	348
9.3.4. Postsinter Treatments	351
9.4. Hardmetal Qualities and Applications	353
References for Chapter 9	362

CHAPTER 10. Tungsten in Catalysis

10.1. Metallic Tungsten	365
10.1.1. Survey	365
10.1.2. Hydrodesulfurization and Hydrodenitrogenation	365
10.2. Oxides	366
10.2.1. Survey	366
10.2.2. DENOX SCR Catalysts	366
10.3. Halides	368
10.4. Carbon Compounds	368

10.4.1. Survey	368
10.4.2. Preparation of Carbide Catalysts	369
10.4.3. WC	369
10.4.4. W ₂ C.	370
10.4.5. Tungsten Carbide Catalysts in Fischer–Tropsch Synthesis	371
10.5. Organotungsten Compounds: Catalysts in ROMP and ADMET	371
10.6. Tungstates	374
10.7. Chalkogenides	374
References for Chapter 10	374

CHAPTER 11. Tungsten Scrap Recycling

11.1. Introduction and General Considerations.	377
11.2. Tungsten Recycling Methods	380
11.2.1. Hydrometallurgy	380
11.2.2. Melting Metallurgy.	381
11.2.3. Direct Recycling	381
11.2.4. Semidirect Recycling	384
References for Chapter 11	385

CHAPTER 12. Ecology

12.1. Introduction	387
12.2. Mining and Ore Dressing.	388
12.3. Chemical Conversion.	392
12.4. Powder Metallurgy	394
12.5. Environmental Considerations about the Substitution of High Speed Steel by Hardmetals	394
References for Chapter 12	394

CHAPTER 13. Economy

13.1. Introduction	395
13.2. World Mine Production	396
13.3. Price of Tungsten	399
13.4. Supply and Demand	401
13.5. Consumption and Use	403
13.6. The “International Tungsten Industry Association” (ITIA).	406
References for Chapter 13	407

CHAPTER 14. Tungsten and Living Organisms

14.1. Introduction	409
14.2. Tungsten in Bacteria (Tungsten Enzymes).	410

14.3. Tungsten and Animals	412
14.3.1. Rats	412
14.3.2. Mice	412
14.3.3. Guinea Pigs	413
14.3.4. Rabbits	413
14.4. Tungsten and Humans	413
14.4.1. Important Data	413
14.4.2. Hardmetal Disease	413
14.4.3. Beneficial Influences	414
References for Chapter 14	416
Index	417
