**Correction to: Knee Surg Sports Traumatol Arthrosc**  
<https://doi.org/10.1007/s00167-015-3881-4>

The author would like to correct the following errors in the publication of the original article:

In the abstract section, under the methods heading, the fourth sentence should read as:

Seventy-five percent of the knees were cementless.

Under the Materials and methods section, the sixth line should read as:

No patient died within 90 days of operation. Median age was 74 (range 48–87 years) with 215 female (82%) and 48 male (18%) patients.

In the Surgical technique section, under the third paragraph, the first sentence should read as:

Cementless components were used in 207 knees. In 69 knees, where bone was considered poor, cement was used on the tibial side [42].
