# Understanding Music with AI: Perspectives on Music Cognition

Edited by Mira Balaban, Kemal Ebcioglu, and Otto Laske

*Cambridge • Menlo Park • London*  
*The AAAI Press/The MIT Press*

---

# Contents

Foreword: A Conversation with Marvin Minsky <i>Marvin Minsky &amp; O. Laske</i>	ix
Introduction	xxxix
<i>Section One</i>	
<b>Two Views on Cognitive Musicology</b>	
1. Artificial Intelligence and Music: A Cornerstone of Cognitive Musicology <i>O. Laske</i>	3
2. Beyond Computational Musicology <i>P. Kugel</i>	30
<i>Section Two</i>	
<b>General Problems in Modeling Musical Activities</b>	
Overview	49
3. Representing Listening Behavior: Problems and Prospects <i>S. W. Smoliar</i>	53
4. Symbolic and Sonic Representations of Sound-Object Structures <i>B. Bel</i>	64
5. Music Structures: Interleaving the Temporal and Hierarchical Aspects in Music <i>B. Balaban</i>	110
6. On Designing a Typed Music Language <i>E. B. Blevis, M. A. Jenkins, J. I. Glasgow</i>	140

7. Logical Representation and Induction for Computer Assisted Composition <i>F. Courtot</i>	156
 <i>Section Three</i>	
<b>Music Composition</b>	
Overview	182
8. Cybernetic Composer: An Overview <i>C. Ames and M. Domino</i>	186
9. Wolfgang: A System Using Emoting Potentials to Manage Musical Design <i>R. D. Riecken</i>	206
10. On the Application of Problem Reduction Search to Automated Composition <i>S. C. Marsella and C. F. Schmidt</i>	238
11. The Observer Tradition of Knowledge Acquisition <i>O. Laske</i>	258
 <i>Section Four</i>	
<b>Analysis</b>	
Overview	290
12. An Expert System for Harmonizing Chorales in the Style of J. S. Bach <i>K. Ebcioğlu</i>	294
13. An Expert System for Harmonic Analysis of Tonal Music <i>H. J. Maxwell</i>	335
14. On the Algorithmic Representation of Musical Style <i>D. Cope</i>	354
 <i>Section Five</i>	
<b>Performance</b>	
Overview	364
15. Bol Processor Grammars <i>B. Bel and J. Kippen</i>	366
16. A New Approach to Music Through Vision <i>S. Ohteru and S. Hashimoto</i>	402

**Section Six**  
**Perception**

Overview	411
17. On Analyzing and Representing Musical Rhythm <i>C. Linster</i>	414
18. On the Perception of Meter <i>B. O. Miller, D. L. Scarborough, J. A. Jones</i>	428
19. The Quantization Problem: Traditional and Connectionist Approaches <i>P. Desain &amp; H. Honing</i>	448

**Section Seven****Learning and Tutoring**

Overview	464
20. An Architecture for an Intelligent Tutoring System <i>M. J. Baker</i>	466
21. A Knowledge Intensive Approach to Machine Learning in Tonal Music. <i>G. Widmer</i>	490

Index	509
