

Submitting an item to the ANU Open Research repository

RESPONSIBLE AREA: University Librarian, ANU Library
CONTACT: repository.admin@anu.edu.au
UPDATED: 17 May 2016

Step 1: login

[Login to the Open Research repository](#) using your [ANU ID and password](#).

Step 2: start a new submission

Select the **Start a New Submission** button.

The screenshot shows the ANU Open Research Library interface. The header includes the Australian National University logo, the text 'Open Research Library', and a search bar. The user is logged in as 'nic.welbourn@anu.edu.au'. The main navigation menu includes 'About', 'Collections', 'Contribute', 'Publishing', 'Policy', 'Copyright', 'Contact', and 'My Open Research'. The breadcrumb trail shows 'Home » My Open Research'. Below the breadcrumb, there is a user profile section for 'My Open Research: Nicholas Michael Welbourn'. At the bottom right of this section, there are two buttons: 'View Accepted Submissions' and 'Start a New Submission'. The 'Start a New Submission' button is circled in red, and a red arrow points to it.

Step 3: enter an identifier

The **New submission: get data from bibliographic external service** screen appears.

- > If you have a DOI, PubMed, arXiv or CiNii NAID identifier for your publication, select **Search for identifier**. Enter the identifier in the relevant box, then select the **Search** button.
- > If you do not have a DOI, PubMed, arXiv or CiNii NAID identifier for your publication, manual entry of publication details is required. Use the drop-down box to select the **ANU Research Publications** collection, then select the **Manual submission** button. Then continue from Step 6 below.

New submission: get data from bibliographic external service

Free search

Search for identifier ← DOI, PubMed, arXiv or CiNii NAID identifier

Upload a file

Exit

Step 4: identifier search results

The identifier search lists all matching publications in the **Results** tab.

- > Select your publication to proceed with the submission process, then select the **See details and import the record** button.
- > If no results are returned, select the **Search Form** tab and either search again, or complete the manual submission process by selecting the **Manual submission** button.

PubMed CrossRef

Multistep microreactions with proteins using electrocapture technology
Astorga-Wells, Juan, Bergman, Tomas, Jörnvall, Hans
2004-05-01

See details & import the record

Select collections: ANU Research Publications

Manual submission

Exit

Step 5: select the collection

- > Check that the publication details of the item you wish to import are correct.
- > Use the drop-down box to choose the collection to which you wish to submit (**ANU Research Publications** is normally the only option listed)
- > Select the **Fill data and start submission** button.

The screenshot displays a 'Publication details' modal window. At the top left, there is a close button (x). Below the title, there are logos for PubMed and CrossRef. The main content area contains the following information:

| | |
|----------------|---|
| Title | Multistep microreactions with proteins using electrocapture technology |
| Author(s) | Astorga-Wells, Juan Bergman, Tomas Jörnvall, Hans |
| Date Published | 2004-05-01 |
| Abstract | A method to perform multistep reactions by means of electroimmobilization of a target molecule in a microflow stream is presented. A target protein is captured by the opposing effects between the hydrodynamic and electric forces, after which another medium is injected into the system. The second medium carries enzymes or other reagents, which are brought into contact with the target protein and react. The immobilization is reversed by disconnecting the electric field, upon which products are collected at the outlet of the device for analysis. On-line reduction, alkylation, and trypsin digestion of proteins is demonstrated and was monitored by MALDI mass spectrometry. |
| DOI | 10.1021/ac0354342 |

Below the details, there is a blue box with an information icon and the text 'Choose the collection you wish to submit to'. Underneath this is a dropdown menu with 'ANU Research Publications' selected. A red arrow points to this dropdown. At the bottom right, there is a button labeled 'Fill data and start submission', which is also circled in red with a red arrow pointing to it.

Step 6: description details

- > Fill in as many details as possible on the submission form. Some of the details have been pre-filled for you as a result of the DOI search.
- > Use the **Next >** button at the bottom of each page to continue.

Submit: Describe this Item ?

Please fill in the requested information about this submission below. In most browsers, you can use the tab key to move the cursor to the next input box or button, to save you having to use the mouse each time.

Enter the names of the authors of this item below.

| | | | |
|----------------|-----------------------|--------------------------------------|--|
| Authors | Astorga-Wells | Juan | 🗑 Remove |
| | Bergman | Tomas | 🗑 Remove |
| | Jörnvall | Hans | 🗑 Remove |
| | Last name, e.g. Smith | First name(s) + "Jr", e.g. Donald Jr | + Add More |

Enter the email address of the authors of this item below.

Author's email + Add More

Enter the author's Uni ID

Author's Uni ID + Add More

Enter the author's name and affiliation

Indicate if the item is Open Access

Access Rights

Enter the title of this item below (i.e. journal article title, book chapter title, report title, etc)

Title

If the item is a book chapter, enter the title of the book below

Book Title

Step 7: file upload

- > If you have a file to upload with your submission, select **Select a file**. Then select the **Next >** button.
- > If there is no file to upload, click the **Skip file upload >** button.

Describe Describe **Upload** Verify License Complete

Submit: Upload a File

Please enter the name of the file on your local hard drive corresponding to your item. If you click "Browse...", a new window will appear in which you can locate and select the file on your local hard drive.

Please also note that the Open Research system is able to preserve the content of certain types of files better than other types. [Information about file types and levels of support for each are available.](#)

Document File:  Select a file...

Please give a brief description of the contents of this file, for example "Main article", or "Experiment data readings".

File Description:

< Previous Cancel/Save Skip file upload > **Next >**

Step 8: verification

The **Verify Submission** screen appears.

If you are not satisfied with your submission, select the relevant **Correct one of these** button to update or enter new information.

> If you are satisfied with your submission, click the **Next >** button.

Describe Describe Upload **Verify** License Complete

Submit: Verify Submission ?

Not quite there yet, but nearly!

Please spend a few minutes to examine what you've just submitted below. If anything is wrong, please go back and correct it by using the buttons next to the error, or by clicking on the progress bar at the top of the page.

If everything is OK, please click the "Next" button at the bottom of the page.

You can safely check the files which have been uploaded - a new window will be opened to display them.
