Using string kernel to predict signal peptide cleavage site based on subsite coupling model

In the article “Using string kernel to predict signal peptide cleavage site based on subsite coupling model” by M. Wang et al. (Amino Acids 28: 395–402, 2005; DOI 10.1007/s00726-005-0189-6), Appendix A and the list of references were incomplete.

The following sentence should be added as first sentence to the appendix:

The kernel used in this work was originally constructed by Vert (2002); for convenience, a brief proof for Proposition 1 is given below.

The following reference should be included in the list of references:

Vert J-P (2002) Support vector machine prediction of signal peptide cleavage site using a new class of kernels for strings. *Pac Symp Biocomput* 7: 649–660
