**Vector Measures
and
Control Systems**

**IGOR KLUVÁNEK
and
GREG KNOWLES**

The Flinders University of South Australia

1976

TABLE OF CONTENTS

I.	PRELIMINARIES	1
	1. Locally convex spaces	1
	2. Extreme and exposed points	4
	3. Measure spaces	8
	4. Conical measures	10
	Remarks	14
II.	VECTOR MEASURES AND INTEGRATION	16
	1. Vector measures; variation and semi-variation	16
	2. Integration	21
	3. Integrability of bounded functions	26
	4. Limit theorems	27
	5. A sufficient condition for integrability	30
	6. An isomorphism theorem	32
	7. Direct sum of vector measures	35
	Remarks	36
III.	FUNCTION SPACES I	38
	1. Topologies	38
	2. Some relations between topologies	41
	3. Completeness	45
	4. Lattice completeness	49
	5. Weak compactness	54
	6. Completion	57
	7. Extreme and exposed points	59
	8. Vector-valued functions	61
	Remarks	66
IV.	CLOSED VECTOR MEASURES	67
	1. Properties of the integration mapping	67
	2. Closed vector measures	70
	3. Closure of a vector measure	72

4. Completeness of $L^1(m)$	73
5. Lattice completeness	74
6. Weak compactness of the range	75
7. Sufficient conditions for closedness	78
Remarks	80
 V. LIAPUNOV VECTOR MEASURES	 82
1. Liapunov vector measures	82
2. Consequences of the test	85
3. Liapunov decomposition	88
4. Moment sequences	89
5. Liapunov extension	93
6. Non-atomic vector measures	94
7. Examples of bang-bang control	98
Remarks	110
 VI. EXTREME AND EXPOSED POINTS OF THE RANGE	 112
1. Extreme points	112
2. Properties of the set of extreme points	115
3. Rybakov's theorem	120
4. Exposed points of the range	122
Remarks	127
 VII. THE RANGE OF A VECTOR MEASURE	 128
1. The problem	128
2. The conical measure associated with a vector measure	130
3. The relation between m and $\Delta(m)$	134
4. Consequences of the test	137
Remarks	139
 VIII. FUNCTION SPACES II	 142
1. Set-valued functions	142
2. Measurable selections	145
3. Sequences of measures	148
4. Extreme points	152
Remarks	153

CONTENTS

ix

IX. CONTROL SYSTEMS	154
1. Attainable set	154
2. Extreme points of the attainable set	156
3. Liapunov control systems	158
4. Non-atomic control systems	160
5. Time-optimal control	162
Remarks	165
