

# Vibrational Spectroscopy of Adsorbates

Editor: R. F. Willis

With Contributions by

B. K. Agrawal G. Allan J. A. Creighton

B. Djafari-Rouhani L. Dobrzynski B. Feuerbacher

P. Hollins D. A. King D. M. Newns

J. Pritchard N. Sheppard D. G. Walmsley

R. F. Willis C. J. Wright

With 97 Figures

Springer-Verlag Berlin Heidelberg New York 1980

# Contents

1. <i>Introduction</i>	
By Roy F. Willis .....	1
1.1 Vibrational Spectroscopy in Relation to Surface Science .....	1
1.2 Techniques in Surface Vibrational Spectroscopy .....	2
1.3 Vibrational Coupling and Surface Phonon Modes .....	4
References .....	5
2. <i>Theory of Dipole Electron Scattering from Adsorbates</i>	
By D.M. News (With 11 Figures) .....	7
References .....	22
3. <i>Angle and Energy Dependent Electron Impact Vibrational Excitation of Adsorbates</i>	
By Roy F. Willis (With 23 Figures) .....	23
3.1 Background .....	23
3.2 Inelastic Electron Scattering from Oriented Molecules .....	24
3.3 Surface Dipole Scattering .....	28
3.3.1 Modes Perpendicular to the Surface .....	30
3.3.2 Surface Trapping in Bound State Surface Resonances ...	32
3.3.3 Modes Parallel to the Surface .....	34
3.4 Dipole Theory of One-Phonon Excitation .....	35
3.5 Multiple Scattering Theory of One-Phonon Excitation .....	40
3.6 Hydrogen Modes on W(100) .....	45
3.6.1 Angle Dependence .....	45
3.6.2 Phonon Sidebands Linewidth .....	48
3.6.3 Impact Energy Dependence .....	49
3.7 Concluding Remarks .....	51
References .....	52

4. <i>Adsorbate Induced Optical Phonons</i>	
By L. Dobrzynski, G. Allan, B. Djafari-Rouhani, and B.K. Agrawal (With 4 Figures) .....	55
4.1 Background .....	55
4.2 A Short Review .....	55
4.3 Some Physical Effects .....	56
4.4 Hydrogen on (001) Surface of Tungsten .....	59
4.5 Oxygen on the (111) Surface of Nickel .....	62
4.6 Conclusion .....	64
References .....	65
5. <i>Inelastic Electron Tunnelling Spectroscopy</i>	
By D.G. Walmsley (With 19 Figures) .....	67
5.1 Background .....	67
5.2 IETS .....	69
5.2.1 Principle of IETS .....	69
5.2.2 Nature of Interaction .....	71
5.2.3 Linewidths .....	72
5.2.4 Sensitivity and Surface Coverage .....	75
5.3 Oxides .....	77
5.3.1 Clean Aluminium Oxide .....	77
5.3.2 Formic Acid on Aluminium Oxide .....	78
5.3.3 Clean Magnesium Oxide .....	80
5.3.4 Formic Acid on Magnesium Oxide .....	82
5.4 Comparison .....	83
5.4.1 Comparison with Electron Energy Loss Spectroscopy(EELS)	83
5.4.2 Comparison with Surface Infrared and Raman Spectro-	
scopies .....	85
5.5 Adsorbate Orientation .....	85
5.6 Conclusion .....	88
References .....	88
6. <i>Inelastic Molecular Beam Scattering from Surfaces</i>	
By B. Feuerbacher (With 15 Figures) .....	91
6.1 Background .....	91
6.2 Atom Scattering from Surfaces .....	92
6.3 Experimental Considerations .....	95
6.3.1 Beam Sources .....	96

6.3.2	Detectors .....	97
6.3.3	Systems .....	98
6.4	Data Interpretation .....	99
6.4.1	Selection of Scattering Conditions .....	99
6.4.2	Selection Rules .....	100
6.4.3	Scattering Kinematics .....	101
6.5	Experimental Results .....	102
6.5.1	Inelastic Studies Without Energy Resolution .....	103
6.5.2	Velocity Resolved Studies .....	104
6.5.3	Dispersion Relations .....	106
6.6	Conclusions and Outlook .....	109
	References .....	110
7.	<i>Neutron Scattering Studies</i>	
	By C.J. Wright (With 6 Figures) .....	111
7.1	Theoretical Background .....	112
	Experimental Considerations .....	115
7.2	Applications .....	117
7.2.1	Sulphide Catalysts .....	118
7.2.2	Butane Adsorption Upon Graphite .....	120
7.2.3	$C_6H_6$ Adsorbed on Raney-Nickel .....	121
7.2.4	Collective Excitations .....	121
7.3	Future Considerations .....	122
	References .....	123
8.	<i>Reflection Absorption Infrared Spectroscopy: Application to Carbon Monoxide on Copper</i>	
	By P. Hollins and J. Pritchard (With 10 Figures) .....	125
8.1	Background .....	125
8.2	Physical Factors in Infrared Reflection at Metal Surfaces ...	126
8.3	Experimental Aspects .....	129
8.4	Some Applications of RAIRS .....	130
8.5	Spectra of CO on Copper .....	130
8.6	Coupling Effects in Vibrational Spectra .....	132
8.7	Modified Dipole Coupling Theories .....	135
8.8	Dipole Coupling in Islands .....	138
	References .....	141

9.	<i>Raman Spectroscopy of Adsorbates at Metal Surfaces</i>	
	By J.A. Creighton (With 12 Figures) .....	145
9.1	Background .....	145
9.2	Experimental Features .....	146
9.3	Enhanced Raman Spectra of Adsorbates on Silver Surfaces .....	148
9.4	Enhanced Raman Spectra of Adsorbates at Metal Other Than Silver .....	153
9.5	The SERS Selection Rule .....	154
9.6	Some Observations on the Mechanism of the Surface Raman Enhancement .....	157
	References .....	162
10.	<i>Vibrations of Monatomic and Diatomic Ligands in Metal Clusters and Complexes - Analogies with Vibrations of Adsorbed Species on Metals</i>	
	By N. Sheppard .....	165
10.1	Background .....	165
10.2	Hydrogen as Adsorbed Species or as a Ligand on Metals .....	166
10.3	Carbon Monoxide as Adsorbed Species and Ligands .....	169
10.4	Nitrogen as Adsorbed Species and as Ligands .....	170
10.5	Oxygen as Adsorbed Species and as Ligands .....	172
10.6	Nitric Oxide, NO, as Adsorbed Species and as Ligands .....	173
10.7	General Conclusions .....	174
	References .....	176
11.	<i>Coupling Induced Vibrational Frequency Shifts and Island Size Determination: CO on Pt{001} and Pt{111}</i>	
	By D.A. King (With 3 Figures) .....	179
11.1	Background .....	179
11.2	CO on Pt{001}: Island Growth .....	179
11.3	CO on Pt{111}: "Gaseous" and Island Species .....	182
11.4	Conclusion .....	183
	References .....	183
