<b>Foreword to the English Edition</b>	<b>vii</b>
<b>Introduction</b>	<b>1</b>
<b>1 Multiresolution analysis</b>	<b>7</b>
1.1 Introduction	7
1.2 The continuous point of view	8
1.2.1 Multiresolution analyses and wavelets	8
1.2.2 The scaling function	11
1.2.3 Conjugate quadrature filters	16
1.3 The discrete point of view	20
1.3.1 The FWT algorithm	20
1.3.2 Multiresolution analyses of $l^2(\mathbb{Z})$	24
1.3.3 Orthonormal wavelet bases for $l^2(\mathbb{Z})$	27
1.4 The multivariate case	33
1.5 Conclusions	34
<b>2 Wavelets and conjugate quadrature filters</b>	<b>37</b>
2.1 Introduction	37
2.2 The general case	38
2.3 The finite case	46
2.4 Wavelets with compact support	53
2.5 Action of the FWT on oscillating signals	58
<b>3 The regularity of scaling functions and wavelets</b>	<b>63</b>
3.1 Introduction	63
3.2 Regularity and oscillation	64
3.3 The subdivision algorithms	68
3.4 Spectral estimates of the regularity	76
3.4.1 A condition sufficient for regularity	77
3.4.2 The critical exponent of a CQF	79

3.4.3	The decay of $\hat{\varphi}$	80
3.5	Estimation of the $L^p$ -Sobolev exponent	84
3.6	Applications	88
3.6.1	Estimating the critical exponent	88
3.6.2	The behavior for large values of $N$	93
<b>4</b>	<b>Biorthogonal wavelet bases</b>	<b>97</b>
4.1	Introduction	97
4.2	General principles of subband coding	99
4.3	Unconditional biorthogonal wavelet bases	103
4.4	Dual filters and biorthogonal Riesz bases	126
4.5	Examples and applications	144
4.5.1	Burt and Adelson's filters	144
4.5.2	Spline filters	151
<b>5</b>	<b>Stochastic processes</b>	<b>165</b>
5.1	Introduction	165
5.2	Linear approximation	169
5.3	Linear approximation of images	172
5.4	Approximation and compression of real images	174
5.5	Piecewise stationary processes	177
5.6	Non-linear approximation	181
<b>A</b>	<b>Quasi-analytic wavelet bases</b>	<b>199</b>
<b>B</b>	<b>Multivariate constructions</b>	<b>207</b>
<b>C</b>	<b>Multiscale unconditional bases</b>	<b>215</b>
<b>D</b>	<b>Notation</b>	<b>225</b>
	<b>References</b>	<b>229</b>
	<b>Author index</b>	<b>233</b>
	<b>Subject index</b>	<b>235</b>
